The Human Senses

PROPRIOCEPTIVE

- It is the sense that allows us to perceive the position and movement of the parts of the body.
- Helps to make smooth and controlled movements, improving the tasting experience.

VESTIBULAR

- Sense that helps maintain balance and spatial orientation.

- Essential to avoid dizziness and maintain focus during the tasting.

TACTILE

- Sense that allows touch, pressure, temperature and pain to be perceived through the skin.
- It provides information on temperature and texture, which influence the sensory experience of the cocktail.

VISION

- Sense that allows the environment to be perceived through the detection of light through the eyes.
- Visual appearance influences the initial perception and expectation of the cocktail's flavor.

AUDITION

- Sense that allows sounds to be perceived through the detection of sound waves by the ears.
- Sounds can complement the sensory experience and anticipate certain textures or sensations of the cocktail.

SMELL

- Sense that allows odors to be perceived through the detection of chemical molecules in the air.
- Smell is essential for the overall perception of flavour and can influence the evaluation of the cocktail.

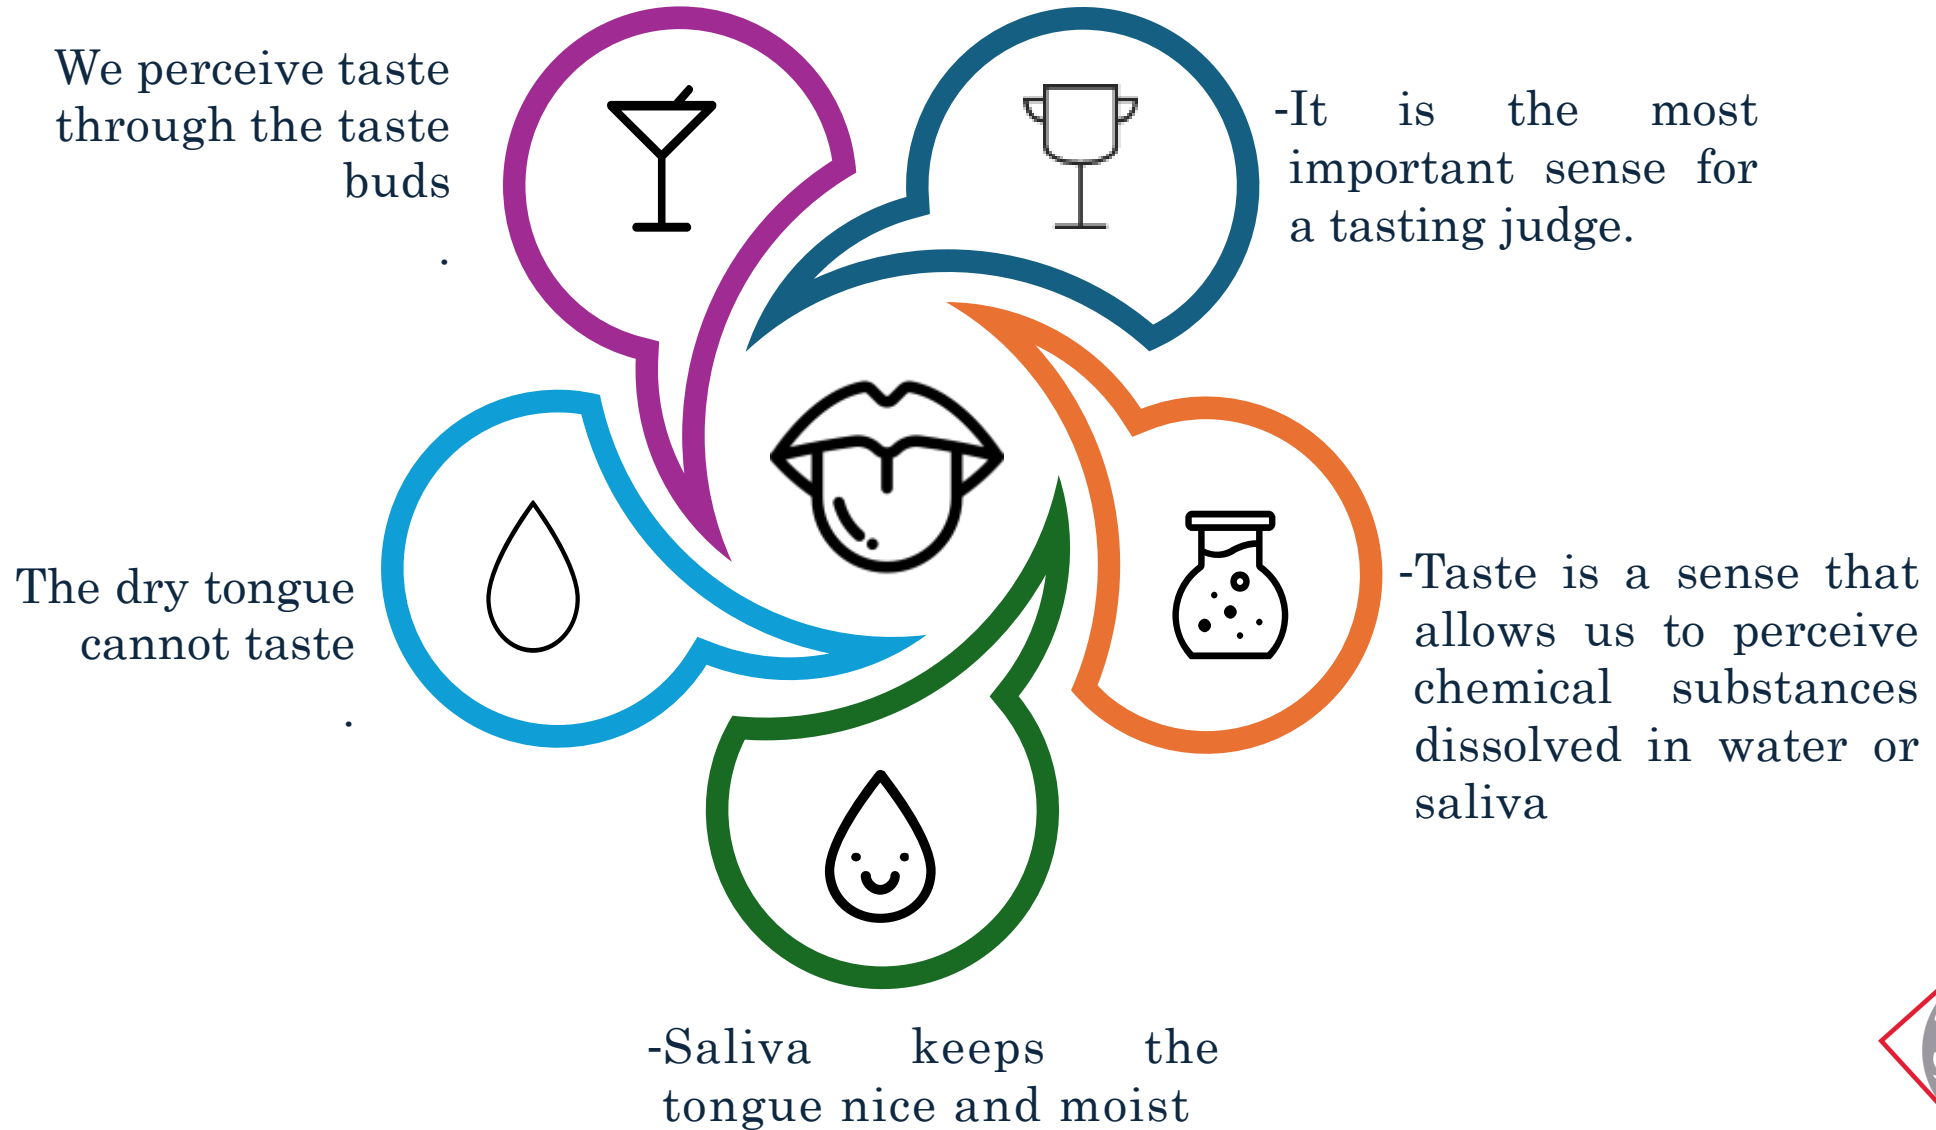

TASTE

- Sense that allows you to perceive flavors through the detection of chemical substances by the taste buds on the tongue.
- Taste is the central sense in cocktail tasting, determining the quality and enjoyment of the same.

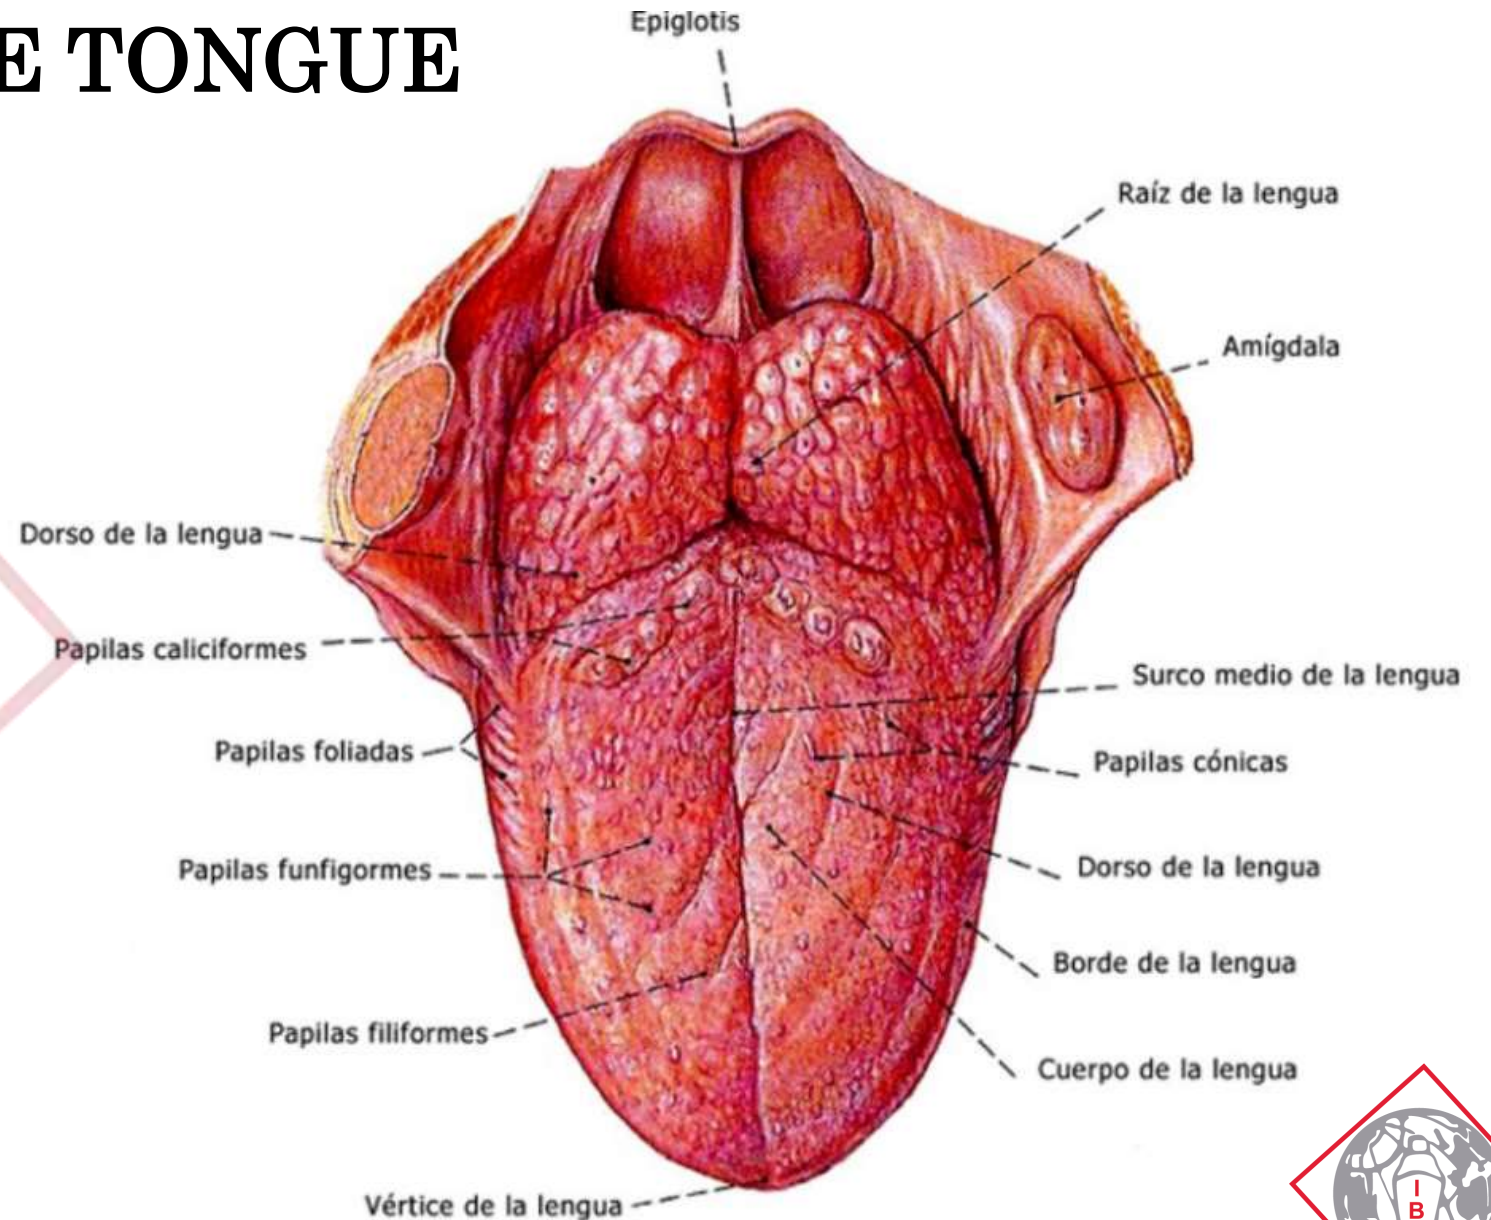

KEYS TO "TASTE"

ANATOMY OF THE TONGUE

The Birth of Taste

-It is covered with various types of papillae.

BASIC PRIMARY TASTES

The 5 Primary Flavors:

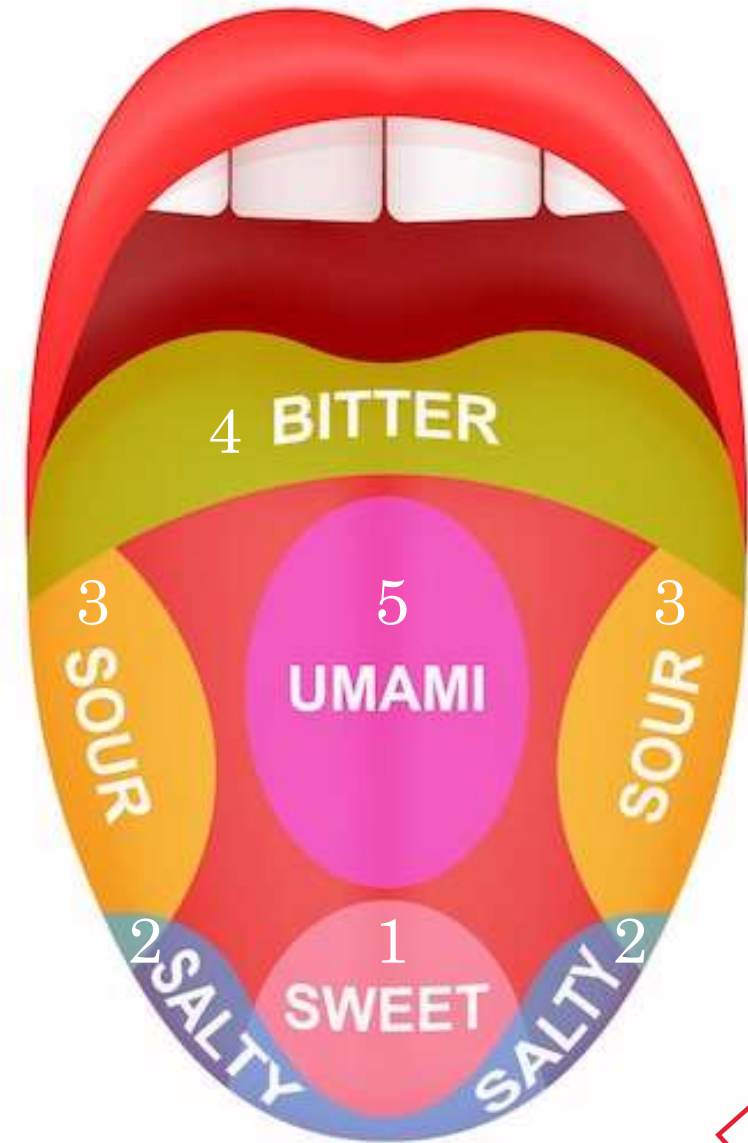

Sweet

Salty

Acid

Bitter

Umami

SWEET TASTE

- Sweet is the most common and widely recognized flavor.
- The sweet taste is usually detected on the tip of the tongue.
- The sweet taste is often associated with good feelings and a sense of security.

SALTY TASTE

- It is mainly perceived on the upper part of the tongue, near the tip.

SOUR TASTE

- Provoca abundante salivación.
- Se percibe en la parte superior de la lengua.

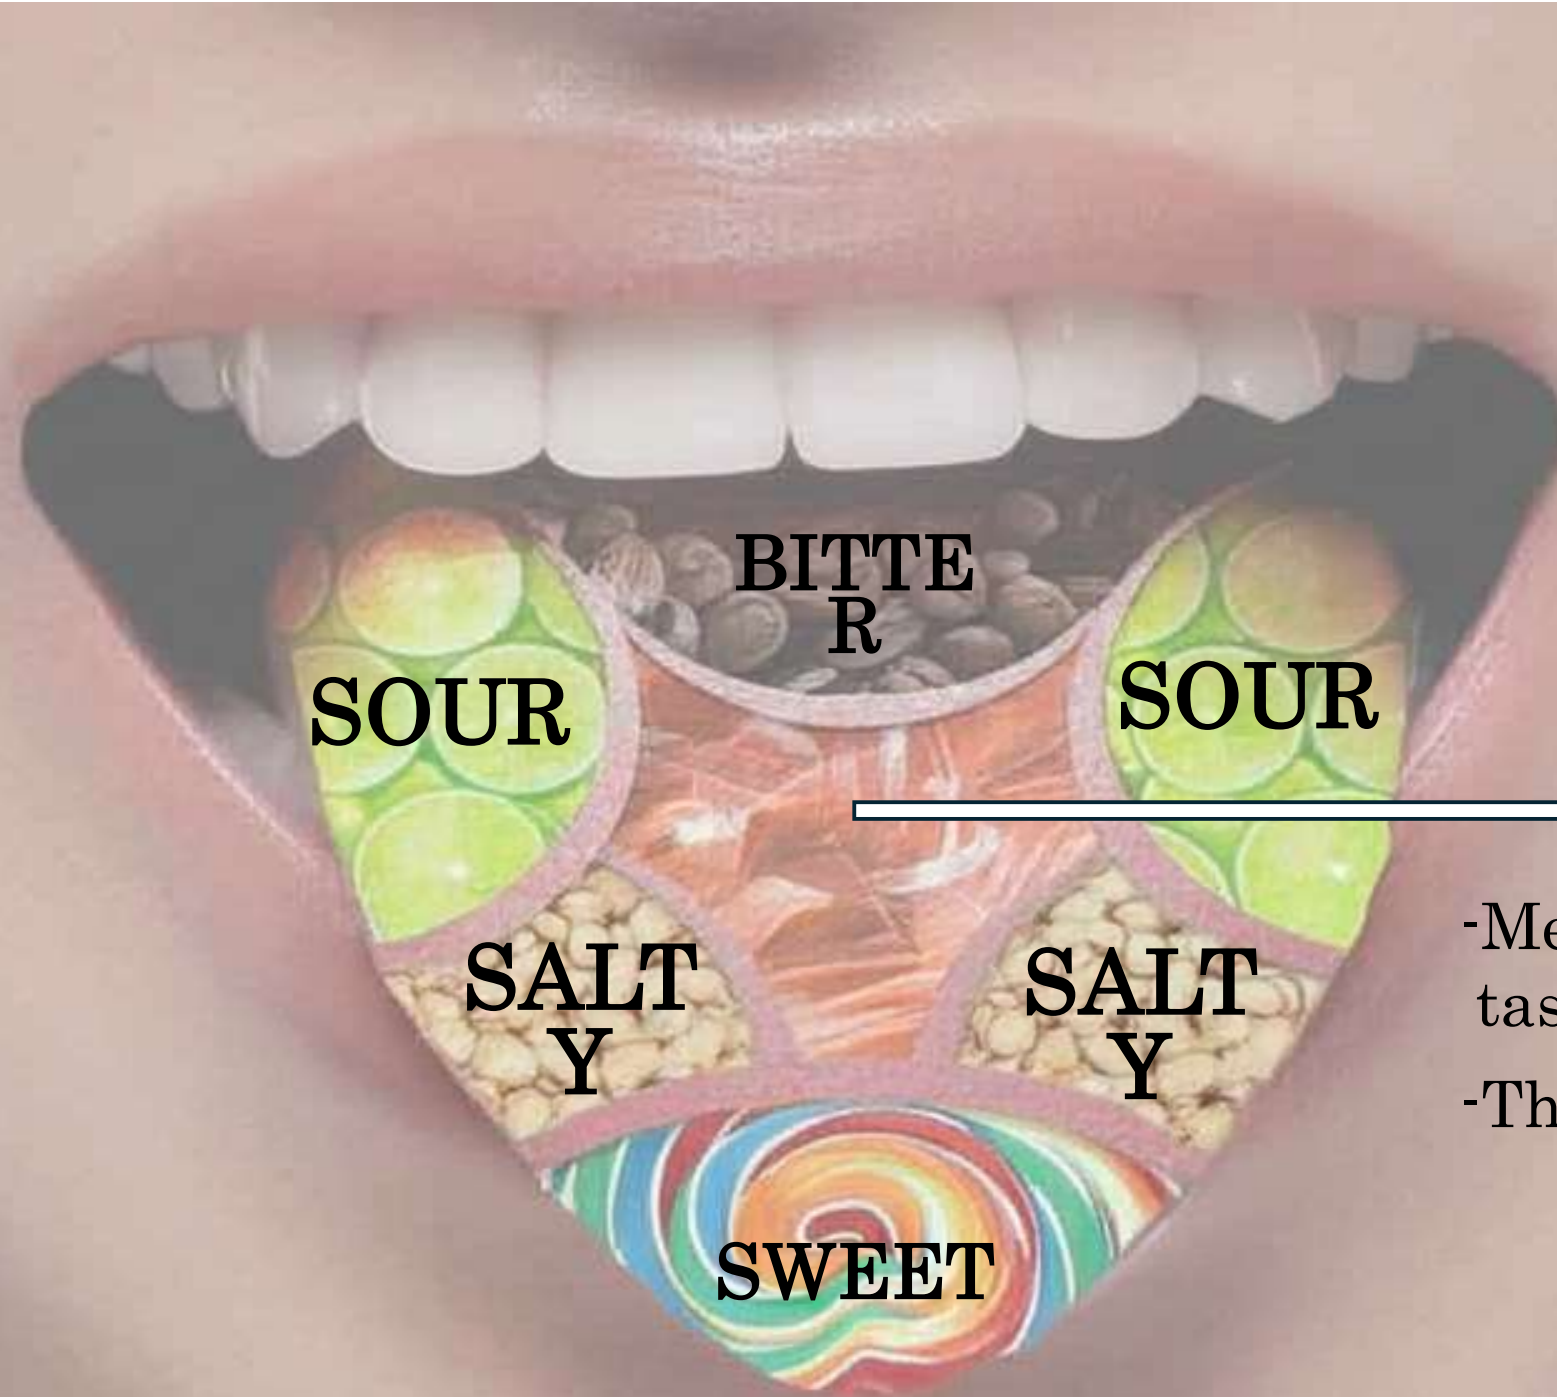

BITTER TASTE

- Opposite of sweet taste
- It is felt on the back of the tongue and has intense persistence

TASTE

UMAMI

- Meaty or salty taste/pleasant taste (sodium glutamate)
- The least known of all tastes

IMPORTANCE OF SMELL

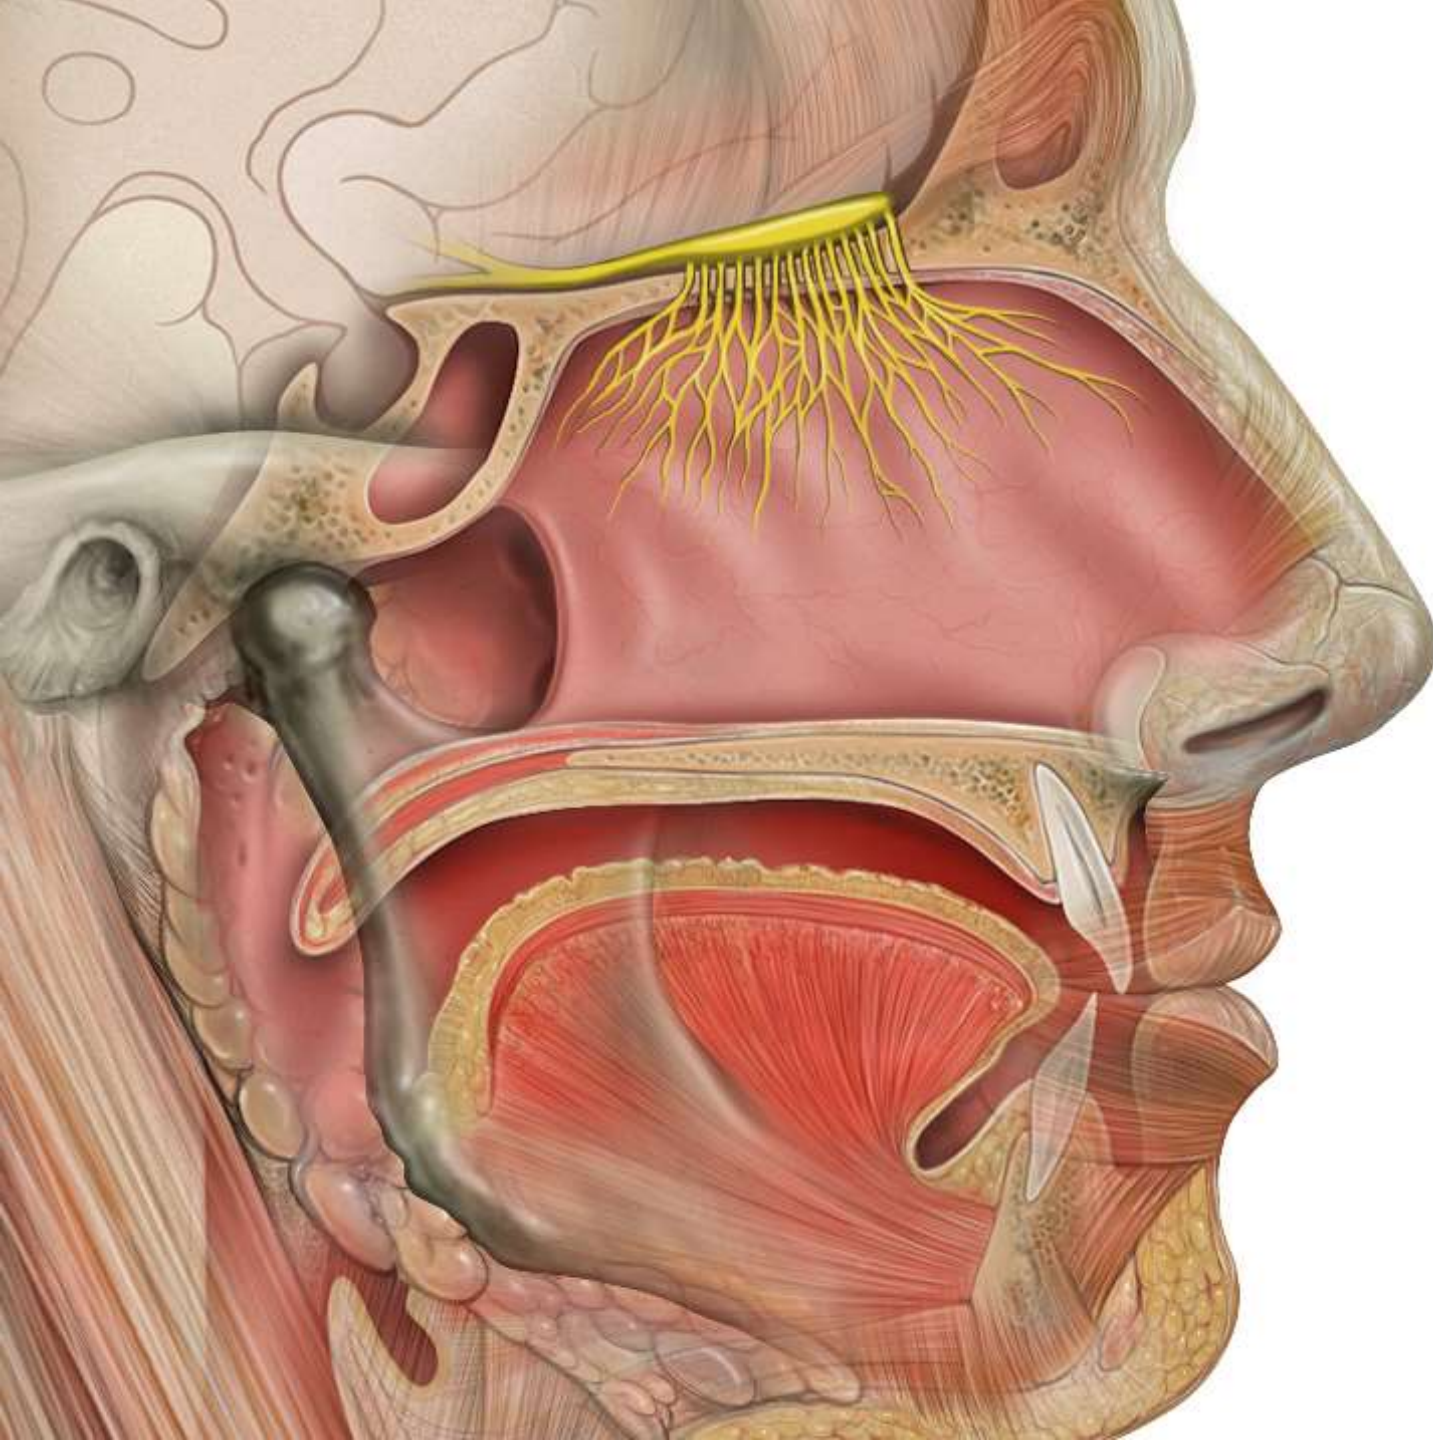

- A fundamental tool for judges in the tasting process.
- It helps to register and identify different smells in the cocktail.
- A person can distinguish about 500 different scents.

THE HUMAN NOSE AND THE OLFACTORY ORGAN

- 10 to 20 million recipient cells.
- Shelf life of about 60 days.
- Smell, emotion, memory.
- Retronasal smell

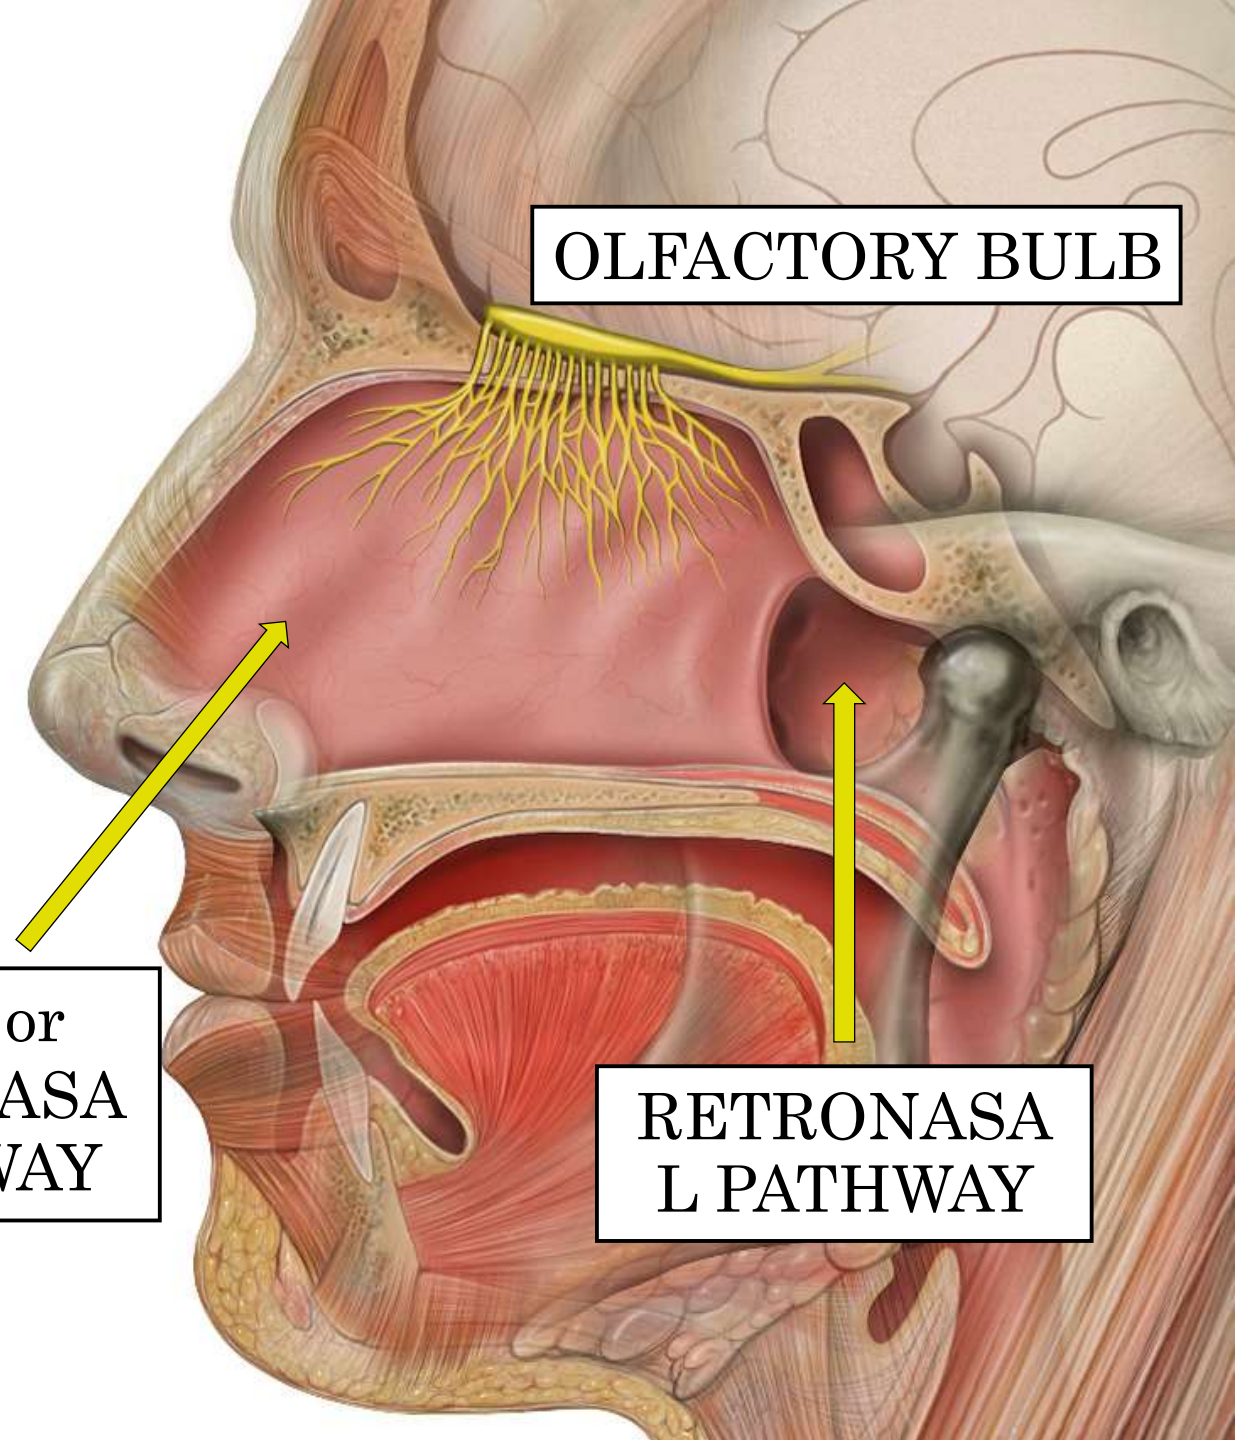

OLFACTORY SENSATIONS

- Two ways of perceiving smell.
- Direct (nasal) aspiration.
- Indirectly (Retronasal)
